## ADDENDUM F - REGION 6 (GULF COAST)

## A. INTRODUCTION

Region 6 is located in the southeastern portion of the state of Texas. This region includes at total of 13 counties, of which 4 were classified as rural and were included in the following analysis. The largest rural county in the region is Wharton, with 41,280 people ( 2010 Census). The following are relevant facts about the region (note: data applies to rural counties studied in this region and does not include non-rural counties):

Region Size: 4,008 square miles
2010 Population Density: 42 persons per square mile
2010 Population: 166,717
2010 Households: 58,177
2010 Median Household Income: \$50,649

The following table summarizes the rural designated counties that were included and evaluated in this report, as well as the non-rural counties that were excluded from our analysis:

| Rural Counties (Studied) Within Region |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Colorado | Matagorda | Walker | Wharton |  |
| Non-Rural Counties (Excluded) Within Region |  |  |  |  |
| Austin | Fort Bend | Harris | Montgomery |  |
| Brazoria | Galveston | Liberty | Waller |  |
| Chambers |  |  |  |  |

## B．KEY FINDINGS

According to persons we interviewed in the region，affordable work force housing is in great demand in rural areas in the region．Due to the lack of housing，the turnover rate among moderate－income level households such as teachers and police officers has become an issue according to local representatives．The nuclear power plant located near Bay City is expected to expand from two reactors to four creating 2,000 additional short－term construction jobs and 200 permanent positions once the reactors are brought on line．Rental housing for both multifamily and single－family homes， especially during the construction phase，will be at a premium．

Based on the Bowen National Research rental housing inventory count，there are 2,141 affordable rental housing units in the region＇s study counties．Of those properties we were able to survey， $95.4 \%$ were occupied．Based on American Community Survey and U．S．Census data，there are 8,919 manufactured homes in the region．Bowen National Research was able to survey manufactured home parks with 439 lots／homes．These manufactured home parks had an $85.9 \%$ occupancy／usage rate，which is comparable to the overall state average of $86.1 \%$ ．Finally，Bowen National Research identified 789 for－sale housing units in the region．These 789 available homes represent $2.1 \%$ of the 37,498 owner－occupied housing units in the region，an indication of limited availability of for－sale housing alternatives．It is of note that $29.0 \%$ of the for－sale housing stock is priced below $\$ 100,000$ ，which would generally be affordable to those making approximately $\$ 30,000$ or less annually．

According to area stakeholders，there is a need for family，senior and persons with disabilities housing in the region．This demand is expected to increase when an expansion of the Bay City nuclear power plant takes place．Lack of workforce housing has caused high employee turnover and a loss of working－ age adults to urban areas．It was the opinion of area stakeholders that first－ time homebuyer programs are needed to retain families in the rural communities in the region．The primary barriers to development in the region include lack of incentives for developers to build in rural areas，lack of infrastructure，and limitations and lack of clarity of city ordinances or land use codes．

Additional key regional findings include:

- Total households within the region are projected to increase by 797, a $1.4 \%$ increase between 2010 and 2015. Overall, the number of households in rural regions of Texas is projected to increase by $1.5 \%$ during this same time, while the overall state increase will be $8.4 \%$. Among householders age 55 and older within the region, it is projected that this age cohort will increase by $9.0 \%$. The overall rural regions of the state will experience an increase in its older adult (age 55+) households base of $8.5 \%$, while the overall state will increase by $17.6 \%$ during this same time period.
- Approximately $45.3 \%$ of renters in the region are paying over $30 \%$ (cost burdened) of their income towards rent compared to $20.2 \%$ of owners in the region who are cost burdened. Statewide, these shares are $44.5 \%$ for renters and $25.6 \%$ for owners. The greatest share of cost burdened renters and the greatest number of cost burdened renter households is in Walker County. The greatest share of cost burdened homeowners and the greatest number of cost burdened homeowners is in Walker County.
- A total of $5.7 \%$ of renter households within the region are considered to be living in overcrowded housing (1.0 or more persons per room) compared to $3.4 \%$ of owner households. Statewide, these shares are $7.3 \%$ for renters and $3.2 \%$ for owners. The greatest share of overcrowded renter-occupied housing is in Colorado County, while the greatest number of overcrowded renter-occupied housing is in Walker County. The highest share among owner-occupied housing and the highest number among owner-occupied housing is within Matagorda County.
- Within the region, the share of renter housing units that lack complete plumbing facilities is $0.5 \%$ among renter-occupied units and $0.5 \%$ among owner-occupied units. Overall, the state average is $0.8 \%$ of renteroccupied units and $0.5 \%$ of owner-occupied units lack complete plumbing facilities.
- Total employment within the region increased by 1,207 employees between 2006 and 2011, representing a $1.7 \%$ increase. The statewide average increase during this same time period is $6.6 \%$.
- The region's largest industry by total employment is within the Public Administration sector at $15.5 \%$. The largest negative change in employment between 2000 and 2010 was within the Manufacturing industry, losing 3,227 employees; the largest positive change was within the Public Administration sector, increasing by 2,206 jobs.
- Between 2006 and 2011, the region's unemployment rate was at its lowest at $4.7 \%$ in 2007 and its highest rate in 2011 at $9.2 \%$, indicating an upward trend in unemployment rates for the region. The state of Texas had unemployment rates ranging from $4.4 \%$ to $8.2 \%$ during the past six years.
- The overall occupancy rate of surveyed affordable rental-housing units in the region is $94.2 \%$. This is below the statewide average of $97.3 \%$ for the rural regions of Texas.
- Of all affordable rental units surveyed in the region, 174 (7.9\%) were built before 1970; 356 (16.1\%) were built since 2000. A total 1,303 units were built between 1970 and 1989, comprising the largest share at $59.1 \%$.
- The lowest gross rent among rental units surveyed in the region is $\$ 283$; highest gross rent is $\$ 993$. This is a wide range and indicates a wide variety of rental housing alternatives offered in the region.
- The estimated number of manufactured homes within the region is 8,919 units with approximately $23.5 \%$ renter-occupied and $76.5 \%$ owneroccupied. There were a total of 439 manufactured home lots surveyed with 62 available, representing an overall occupancy/usage rate of 85.9\%. This is comparable to the state average (86.1\%) occupancy rate for manufactured homes.
- Rental rates of manufactured homes surveyed range between \$300 and $\$ 750 /$ month. The rates fall within the rental rates of the affordable apartments surveyed in the region.
- A total of 789 for-sale housing units were identified within the region that were listed as available for purchase. Less than one-third (29.0\%) of the units were priced below $\$ 100,000$. The average listed price of homes under $\$ 100,000$ is $\$ 70,583$, representing a moderate base of affordable for-sale product that is available to low-income households. It should be noted, however, that much of this supply is older (pre-1960) and likely lower quality product that requires repairs or renovations.
- The total affordable housing gap for the entire region was 6,083 rental units and 1,099 for-sale units. This does not mean that the entire region can support 6,083 new rental units and 1,099 new for-sale units. Instead, these numbers are primarily representative of the number of households in the region that are living in cost burdened, overcrowded or substandard housing. Since not all households living in such conditions are willing or able to move if new product is built, only a portion of the units cited above could be supported. Typically, only about $10 \%$ of the housing gap within a county can be supported at an individual site. Housing gaps for individual counties are included at the end of this addendum. The largest renter-occupied housing gap and the largest owner-occupied housing gap are in Walker County.

## C. DEMOGRAPHICS ANALYSIS

## 1. POPULATION TRENDS

Source: 2000 Census; 2010 Census; ESRI; Urban Decision Group; Bowen National Research

The population bases by age are summarized as follows:

|  |  | Population by Age |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | <25 | 25 to 34 | 35 to 44 | 45 to 54 | 55 to 64 | 65 to 74 | 75+ |

## D. ECONOMIC ANALYSIS

This region is located in the southeastern portion of the state. Primary job sectors in this region include Health Care \& Social Assistance and Public Administration. The overall job base has increased by 1,207, or by $1.7 \%$, between 2006 and 2011. The region's unemployment rate ranged from 4.7\% to $9.2 \%$ over the past six years.

## 1. EMPLOYMENT BY JOB SECTOR

Employment by industry is illustrated in the following table:

|  | Largest Industries by County |  |
| :---: | :---: | :---: |
| Industry | Percent of <br> Total Employment |  |
| Colorado County | Health Care \& Social Assistance | $15.2 \%$ |
| Matagorda County | Health Care \& Social Assistance | $19.1 \%$ |
| Walker County | Public Administration | $28.3 \%$ |
| Wharton County | Retail Trade | $17.1 \%$ |
| Sum of Rural Region | Public Administration | $15.5 \%$ |
| Urban Areas | Retail Trade | $11.9 \%$ |
| State of Texas | Retail Trade | $13.1 \%$ |

Source: 2000 Census; ESRI; Urban Decision Group; Bowen National Research

Employment by industry growth, between 2000 and 2010, is illustrated in the following table:

|  | Largest Industry Changes by County between 2000 and 2010 |  |
| :---: | :---: | :---: |
|  | Industry | Number of Jobs |
| Colorado County | Agriculture, Forestry, Fishing \& Hunting | -596 |
| Matagorda County | Utilities | $-1,257$ |
| Walker County | Public Administration | 1,957 |
| Wharton County | Agriculture, Forestry, Fishing \& Hunting | -990 |
| Sum of Rural Region | Manufacturing | $-3,227$ |
| Urban Areas | Wholesale Trade | 84,567 |
| State of Texas | Health Care \& Social Assistance | 345,031 |

## E. HOUSING SUPPLY ANALYSIS

This housing supply analysis considers both rental and for-sale housing. The data collected and analyzed includes primary data collected directly by Bowen National Research and secondary data sources including American Community Survey, U.S. Census housing information and data provided by various government entities such as the Texas Department of Housing and Community Affairs, HUD, Public Housing Authorities and USDA.

At the time this report was prepared, housing-specific data from the 2010 Census was limited to total housing, housing units by tenure, and total vacant units. For the purposes of this supply analysis, as it relates to secondary data, we have used 2010 Census data and ESRI estimates combined with the most recent data from American Community Survey (2005 to 2009) to extrapolate various housing characteristics for 2010, whenever possible.

## Rental Housing

Rental housing includes traditional apartments, single-family homes, duplexes, and manufactured/manufactured homes. As part of this analysis, we have collected and analyzed the following data for each study area:

Primary Data (Information Obtained from our Survey of Rentals):

- The Number of Units and Vacancies by Program Type
- Number of Vouchers
- Gross Rents of Tax Credit Projects Surveyed
- Distribution of Surveyed Units by Bedroom Type
- Distribution of Surveyed Units by Year Built
- Square Footage Range by Bedroom Type
- Share of Units with Selected Unit and Project Amenities
- Distribution of Manufactured Homes
- Manufactured Homes Housing Costs
- Manufactured Home Park Occupancy Rates
- Manufactured Housing Project Amenities

Secondary Data (Data Obtained from Published Sources)

- Households by Tenure (2010 Census)
- Housing by Tenure by Year Built (ACS)
- Housing by Tenure by Number of Bedrooms (ACS)
- Housing Units by Tenure by Number of Units in Structure (ACS)
- Median Housing Expenditures by Tenure (ACS)
- Percent of Income Applied to Housing Costs (ACS)
- Number of Occupants Per Room by Tenure (ACS)
- Housing Units by Inclusion/Exclusion of Plumbing Facilities (ACS)
- Distribution of Manufactured Homes
- 10-Year History of Building Permits Issued (SOCDS)

## For-Sale Housing

We collected and analyzed for-sale housing for each study area. Overall, 13,881 available housing units were identified in the 13 study regions. We also included residential foreclosure filings from the past 12 months. Additional information collected and analyzed includes:

- Distribution of Available Housing by Price Point (Realtor.com)
- Distribution of Available Housing by Bedrooms (Realtor.com)
- Distribution of Available Housing by Year Built (Realtor.com)
- Distribution of Owner-occupied Housing by Housing Value (U.S. Census \& ESRI)
- Foreclosure Rates (RealtyTrac.com)

Please note, the totals in some charts may not equal the sum of individual columns or rows or may vary from the total reported in other tables, due to rounding.

## 1. RENTAL HOUSING

We identified 2,141 affordable housing units contained in 37 projects within study counties of the region. Bowen National Research surveyed projects with a total of 2,103 units. These units have a combined $94.2 \%$ occupancy rate.

The following table summarizes the inventory of all affordable rental housing options by program type that were identified within the rural counties within the region.

|  | Rural Texas Rental Housing Inventory 2011 |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Surveyed Units |  |  |  | Not Surveyed Units |  |  |  | Total Units |  |  |  |
| County | TAX | HUD | PH | USDA | TAX | HUD | PH | USDA | TAX | HUD | PH | USDA |
| Colorado | 0 | 89 | 0 | 124 | 0 | 0 | 0 | 0 | 0 | 89 | 0 | 124 |
| Matagorda | 60 | 220 | 92 | 180 | 0 | 0 | 0 | 38 | 60 | 220 | 92 | 218 |
| Walker | 514 | 109 | 100 | 0 | 0 | 0 | 0 | 0 | 514 | 109 | 100 | 0 |
| Wharton | 0 | 241 | 150 | 224 | 0 | 0 | 0 | 0 | 0 | 241 | 150 | 224 |
| Region Total | 574 | 659 | 342 | 528 | 0 | 0 | 0 | 38 | 574 | 659 | 342 | 566 |

Tax - Tax Credit (both 9\% and 4\% bond)
HUD - Department of Housing and Urban Development (HUD Sections 8, 202, 236 and 811)
PH - Public Housing
USDA - United States Department of Agriculture (RD 514, 515 and 516)
Note: Unit counts do not include Housing Choice Vouchers, but do include project-based subsidized units

HUD financed projects make up the greatest number of affordable housing units in the region.

A total of 517 Housing Choice Vouchers were issued in the region.

## Apartments

The following table summarizes the breakdown of units surveyed within the region. The distribution is illustrated by whether units operate under the Tax Credit program or under subsidy, as well as those that may operate under overlapping programs (Tax Credit/Subsidized).

|  | Surveyed Projects |  |  |
| :---: | :---: | :---: | :---: |
|  | Units | Vacant | Occ. |
| $<1-B R$ | 902 | 55 | $93.9 \%$ |
| $2-B R$ | 840 | 42 | $95.0 \%$ |
| $3+-B R$ | 351 | 10 | $97.2 \%$ |

## Manufactured Housing

We identified and evaluated manufactured homes (manufactured homes) through a variety of sources, including Bowen National Research's telephone survey of manufactured home parks, TDHCA's Manufactured Housing Division, U.S. Census, American Community Survey, and www.manufacturedhome.net.

The following table summarizes the estimated number of manufactured home rental units based on ACS's 2005-2009 inventory of manufactured homes.

| Manufactured Home Units by Type (Rent vs. Own) |  |  |
| :---: | :---: | :---: |
| Renter-Occupied | Owner-Occupied | Total |
| 2,100 | 6,819 | 8,919 |

The following table illustrates the occupancy/usage percentage of lots within manufactured home parks within the region.

| Manufactured Home Park Survey <br> Percent Occupancy/Usage |  |  |
| :---: | :---: | :---: |
| Total Lots | Total Lots Available | Percent |
| Occupancy/Usage |  |  |
| 439 | 62 | $85.9 \%$ |

Source: Bowen National Research - 2011 Survey
The following summarizes the ranges of quoted rental rates within the surveyed manufactured home parks for the region. The rates illustrated include fees for only the lot as well as fees for lots that already have a manufactured home available for rent.

| Manufactured Home Park Survey <br> Rental Rates Range |  |
| :---: | :---: |
| Lot Only | Lot with Manufactured Home |
| $\$ 175-\$ 310$ | $\$ 300-\$ 750$ |

Source: Bowen National Research - 2011 Survey
As part of the Bowen National Survey, we identified which manufactured home parks included an on-site office and laundry facilities, as well as which facilities included all standard utilities in the rental rates. This information is illustrated for the region in the following table.

| Manufactured Home Park Survey |  |  |
| :---: | :---: | :---: |
| Percent of Parks Offering On-Site Amenities \& Utilities |  |  |
| Office | Laundry Facility | All Utilities* |
| $60.0 \%$ | $40.0 \%$ | $0.0 \%$ |

[^5]
## Secondary Housing Data (US Census and American Community Survey)

In addition to our survey of rental housing, we have also presented and evaluated various housing characteristics and trends based on U.S. Census Data. The tables on the following pages summarize key housing data sets for the region. In cases where 2010 Census data has not been released, we have used ESRI data estimates for 2010 and estimates from the American Community Survey of 2005 to 2009 to extrapolate rental housing data estimates for 2010.

The following table summarizes 2000 and 2010 housing units by tenure and vacant units for the region.

|  | Housing Status |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Renter- <br> Occupied | Owner- <br> Occupied | Total <br> Occupied | Vacant | Total Households |
| 2000 | 18,374 | 36,269 | 54,643 | 11,103 | 65,746 |
| 2010 | 20,679 | 37,498 | 58,177 | 12,336 | 70,513 |

Source: 2000 Census; 2010 Census; ESRI; Urban Decision Group; Bowen National Research

## 2. FOR-SALE HOUSING

We identified, presented and evaluated for-sale housing data for the region.

The available for-sale housing stock by price point for the region is summarized as follows:

| Available For-Sale Housing by Price Point |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Less Than \$100k | \$100,000-\$139,999 |  | \$140,999-\$199,999 |  | \$200,000-\$300,000 |  |  |
| Units | Avg. Price | Units | Avg. Price | Units | Avg. Price | Units | Avg. Price |
| 229 | $\$ 70,583$ | 175 | $\$ 124,259$ | 226 | $\$ 168,521$ | 159 | $\$ 252,208$ |

The distribution of available for-sale units by bedroom type, including the average sales price, is illustrated as follows:

| Available For-Sale Housing by Number of Bedrooms |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| One-Bedroom |  | Two-Bedroom |  | Three-Bedroom |  | Four-Bedroom | Five-Bedroom+ |  |  |
| Units | Avg. Price | Units | Avg. Price | Units | Avg. Price | Units | Avg. Price | Units | Avg. Price |
| 39 | $\$ 108,622$ | 189 | $\$ 131,781$ | 443 | $\$ 148,631$ | 102 | $\$ 177,713$ | 8 | $\$ 226,650$ |

The age of the available for-sale product in the region is summarized in the following table:

| Available For-Sale Housing by Year Built |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2006 to Present |  | 2001 to 2005 |  | 1991 to 2000 |  | 1961 to 1990 |  | 1960 \& Earlier |  |
| Units | Avg. Price | Units | Avg. Price | Units | Avg. Price | Units | Avg. Price | Units | Avg. Price |
| 68 | \$181,201 | 73 | \$191,724 | 64 | \$157,846 | 374 | \$142,737 | 159 | \$125,090 |

The following table illustrates estimated housing values based on the 2000 Census and 2010 estimates for owner-occupied units within the region.

|  | Estimated Home Values |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | <\$40,000 | $\begin{gathered} \$ 40,000- \\ \$ 59,999 \end{gathered}$ | $\begin{gathered} \hline \$ 60,000- \\ \$ 79,999 \end{gathered}$ | $\begin{gathered} \hline \$ 80,000- \\ \$ 99,999 \end{gathered}$ | $\begin{gathered} \mathbf{\$ 1 0 0 , 0 0 0} \\ -\$ 149,999 \end{gathered}$ | $\begin{gathered} \mathbf{\$ 1 5 0 , 0 0 0}- \\ \$ 199,999 \end{gathered}$ | \$200,000+ |

## F. STAKEHOLDER INTERVIEWS \& DEVELOPMENT <br> BARRIERS

Stakeholder interviews were conducted with over 200 representatives across all 13 rural regions in Texas as well as stakeholders who address housing issues at the state level. Opinions on affordable housing issues were sought from many disciplines throughout the housing industry including local, county, regional and state government officials, developers, housing authorities, finance organizations, grant writers, and special needs advocates. With the vast size and diverse nature of rural areas throughout the state of Texas, these interviews provided valuable information allowing us to complement statistical analysis with local insight and perspectives on those factors that influence and impact development of housing in rural Texas.

Regional stakeholders were asked to respond to the following rural housing issues as they relate to their specific area of Texas as well as their particular area of expertise.

## - Existing Housing Stock

o Affordability
o Availability of subsidized and non-subsidized rental housing
o Availability of for-sale housing
o Quantity of affordable multifamily housing versus single-family homes
o Condition and quality of manufactured housing
o Quality and age of housing stock (both subsidized and non-subsidized)
o Location

## - Housing Needs

o Segments of the population with the greatest need for affordable housing in rural areas of Texas
o Type(s) of housing that best meet rural Texas housing needs
o The need for homebuyer programs versus rental programs
o New construction versus revitalization of existing housing

## - Housing for Seniors

o Affordability
o Availability
o Demand for additional housing
o Accessibility Issues
o Access to community and social services
o Obstacles to the development of rural senior housing
o Transportation issues

- Housing for Persons with Disabilities
o Affordability
o Availability
o Demand for additional housing
o Accessibility Issues
o Access to community and social services
o Obstacles to the development of rural housing for persons with disabilities
o Transportation issues
- Manufactured Housing
o Affordability
o Availability
o Quality
o Demand
o Role of manufactured housing in rural Texas
- Barriers to Housing Development
o Infrastructure
o Availability of land
o Land costs
o Financing programs
o Community support
o Capacity of developers to develop affordable housing in rural Texas
o Recommendations to reduce or eliminate barriers

## - Residential Development Financing

o Rating existing finance options with regard to effectiveness in rural Texas markets
o Residential development financing options that work well in rural Texas
o Prioritizing rural development funding
o How existing finance options may be modified to work better
The following summarizes the general content and consensus (when applicable) of the interviews we conducted and are not necessarily the opinions or conclusions of Bowen National Research.

## 1. Introduction

Region 6 is located in the Gulf Coast portion of the state of Texas. This region includes the following four counties which were classified as rural.

| Counties in Region |  |  |  |
| :--- | :---: | :---: | :---: |
| Colorado | Matagorda | Walker | Wharton |

Affordable work force housing is in great demand in rural areas in the region. Due to the lack of housing, the turnover rate among moderateincome level households such as teachers and police officers has become an issue according to local representatives. The nuclear power plant located near Bay City is expected to expand from two reactors to four creating 2,000 additional short-term construction jobs and 200 permanent positions once the reactors are brought on line. Rental housing for both multifamily and single-family homes, especially during the construction phase, will be at a premium.

Based on the Bowen National Research rental housing inventory count, there are 2,141 affordable rental housing units in the region's study counties. Of those properties we were able to survey, $95.4 \%$ were occupied, with many of the projects maintaining long waiting lists. Based on American Community Survey and U.S. Census data, there are 8,919 manufactured homes in the region. Bowen National Research was able to survey manufactured home parks with 439 lots/homes. These manufactured home parks had an $85.9 \%$ occupancy/usage rate, which is comparable to the overall state average of $86.1 \%$. Finally, Bowen National Research identified 789 for-sale housing units in the region. These 789 available homes represent $2.1 \%$ of the 37,498 owner-occupied housing units in the region, an indication of limited availability of for-sale housing alternatives. It is of note that $29.0 \%$ of the for-sale housing stock is priced below $\$ 100,000$, which would generally be affordable to those making approximately $\$ 30,000$ or less annually.

## 2. Existing Housing Stock

According to local representatives, there is a need for additional affordable housing. Non-subsidized, affordable, rental housing is non-existent in the rural areas within the region and the majority of subsidized and subsidized/ Tax Credit properties are fully occupied. There is a demand for affordable for-sale housing, but little availability.

## 3. Housing Need

Stakeholders that we spoke with believe that underemployed families with low- to moderate-income levels have the greatest need for affordable housing in rural areas of the region, followed by seniors and persons with disabilities. Due to the lack of workforce housing in rural areas, some small cities are experiencing employee turnover rates of $50 \%$ to $75 \%$. As residents find jobs closer to urban areas, they are relocating to these areas where housing availability is greater and more varied. If they are already living closer to urban areas they generally do not have to commute. The type of housing in greatest demand would be three-bedroom, affordable owner-occupied, single-family homes and affordable two- and threebedroom apartments. The First Time Home Buyer program provides the greatest assistance to families in need of housing, but there is typically not enough funding in this program to meet demand. Funding for affordable single-family housing should be the first priority and then additional multifamily development funding.

## 4. Housing for Seniors/Persons with Disabilities

Additional housing for seniors and persons with disabilities is also needed; with one- and two-bedroom affordable rental units best filling this gap in housing. This should also be balanced with rehabilitation and accessibility modifications of owner-occupied senior housing and is needed most in cities with fewer than 10,000 residents. Many nonprofit agencies in the area connect seniors and persons with disabilities with community and social services and this arrangement appears to be the most cost effective means of providing access.

## 5. Barriers to Housing Development

Representatives within this region stated that the most common barriers to development in rural areas of this region are the lack of incentives for developers, lack of infrastructure, and some city and land use ordinances that prohibit manufactured housing. Developers absolutely have the capacity to develop in rural areas in Texas; however, it is much easier and less risky to develop in urban, suburban and exurban areas since construction costs are lower, profit margins are not as slim and there is a larger pool of potential residents

## 6. Residential Development Financing

According to local developers and government officials, equity partners and financing institutions have increased the percentage of funds required to be pledged toward the note well above $20 \%$, and combined with the risk of developing in rural areas and small profit margins this has stifled much needed development.

Developers and private builders tend to build housing in urban areas with populations of greater than 50,000 because it is easier to make the project financially feasible. Incentives need to be put in place to bring developers to the more rural areas, such as additional points in the scoring process for rural area affordable housing development and possibly tax-exempt state or local bonds. Partnerships between TDHCA and rural, nonprofit, housing authorities or for-profit developers would allow TDHCA to more easily and accurately assess needs in rural areas and make sure that funds are distributed most effectively. The down payment and closing cost programs offered work very well in this region of the state and mandatory homeowner education classes associated with these programs bring foreclosure rates down far below typical state averages (. 0256 overall foreclosure rate for homeowners attending these classes).

## 7. Conclusions

There is a need for family, senior and persons with disabilities housing in the region. This demand is expected to increase when an expansion of the Bay City nuclear power plant takes place. Lack of workforce housing has caused high employee turnover and a loss of working-age adults to urban areas. First-time homebuyer programs are needed to retain families in the rural communities in the region. The primary barriers to development in the region include lack of incentives for developers to build in rural areas, lack of infrastructure, and limitations and lack of clarity of city ordinances or land use codes.

## G. DEMAND ANALYSIS

Pursuant to the Texas Department of Housing and Community Affairs' RFP, Bowen National Research conducted a housing gap analysis for rental and for-sale housing that considers three income stratifications. These stratifications include households with incomes of up to 30\% of Area Median Household Income (AMHI), households with incomes between 31\% and $50 \%$ of AMHI, and households with incomes between $51 \%$ and $80 \%$ of AMHI. This analysis identifies demand for additional housing units for the most recent baseline data year (2010) and projected five years (2015) into the future.

The demand components included in each of the two housing types are listed as follows:

Rental Housing Gap Analysis
Demand Factors
Supply Factors

- Renter Household Growth - Available Rental Housing Units
- Cost Overburdened Households
- Pipeline Units*
- Overcrowded Housing
- Households in Substandard Housing
*Units under construction, planned or proposed

## For-Sale Housing Gap Analysis

## Demand Factors

Supply Factors

- Owner Household Growth
- Available For-Sale Housing Units
- Replacement Housing - Pipeline Units*
*Units under construction, planned or proposed
The demand factors for each housing segment for each income stratification are combined, as are the housing supply components. The overall supply is deducted from the overall demand to determine the housing gaps (or surpluses) that exist among the income stratifications in each study area.

These supply and demand components are discussed in greater detail on the following pages.

## Rental Housing Gap Analysis

We compared various demand components with the available and pipeline housing supply to determine the number of potential units that could be supported in each of the study areas. The following is a narrative of each supply and demand component considered in this analysis of rental housing:

- Renter household growth is a primary demand component for new rental units. Using 2010 Census data and ESRI estimates for renter households by income level for 2010 and 2015, we are able to project the number of new renter households by income level that are expected to be added to each study area.
- Cost overburdened households are those renter households that pay more than $35 \%$ of their annual household income towards rent. Typically, such households will choose a comparable property (including new affordable housing product) if it is less of a rent burden. For the purposes of this analysis, we have used the share of rent overburdened households from the 2000 Census and applied it to the estimated number of households within each income stratification in 2010.
- Overcrowded housing is often considered housing units with 1.01 or more persons per room. These units are often occupied by multigenerational families or large families that are in need of more appropriately-sized and affordable housing units. For the purposes of this analysis, we have used the share of overcrowded housing from the 2000 Census and applied it to the estimated number of households within each income stratification in 2010.
- Substandard housing is typically considered product that lacks complete indoor plumbing facilities. Such housing is often considered to be of such poor quality and in disrepair that is should be replaced. For the purposes of this analysis, we have used the share of households living in substandard housing from the 2000 Census and applied it to the estimated number of households within each income stratification in 2010.
- Available rental housing is any rental product that is currently available for rent. This includes any units identified through our survey of nearly 900 affordable rental properties identified in the study areas, published listings of available rentals, and rentals disclosed by local realtors or management companies. It is important to note, however, that we only included available units developed under state or federal housing programs, and did not include units that may be offered in the market that were privately financed.
- Pipeline housing is housing that is currently under construction or is planned or proposed for development. We identified pipeline housing during our telephone interviews with local and county planning departments and through a review of published listings from housing finance entities such as TDHCA, HUD and USDA.

## For-Sale Housing Gap Analysis

This section of the report addresses the market demand for for-sale housing alternatives in the study areas. There are a variety of factors that impact the demand for new for-sale homes within an area. In particular, area and neighborhood perceptions, quality of school districts, socio-economic characteristics, demographics, mobility patterns, and active builders all play a role in generating new home sales. Support can be both internal (households moving within the market) and external (households new to the market).

While new household growth alone is often the primary contributor to demand for new for-sale housing, the lack of significant development of such housing in a market over an extended time period and the age of the existing housing stock are indicators that demand for new housing will also be generated from the need to replace some of the older housing stock. As a result, we have considered two specific sources of demand for new for-sale housing in the study areas:

- New Housing Needed to Meet Projected Household Growth
- Replacement Housing for Functionally Obsolete Housing

These two demand components are combined and then compared with the available for-sale housing supply and any for-sale projects planned for the market to determine if there is a surplus or deficit of for-sale housing. This analysis is conducted on three price point segmentations: Under $\$ 100,000$, between $\$ 100,000$ and $\$ 139,999$, and between $\$ 140,000$ and $\$ 200,000$. Housing priced above $\$ 200,000$ is not considered affordable to low- and moderate-income households, and was therefore not considered in this analysis.

For the purposes of this analysis, we conservatively assume that a homebuyer will be required to make a minimum down payment of $\$ 10,000$ or $10.0 \%$ of the purchase price for the purchase of a new home. Further, we assume that a reasonable down payment will equal approximately $35.0 \%$ to $45.0 \%$ of a household's annual income. Using this methodology, the following represents the potential purchase price by income level:

| Income Level | Down Payment | Maximum <br> Purchase Price |
| :---: | :---: | :---: |
| Less Than $\$ 29,999$ | $\$ 10,000$ | Up to \$100,000 |
| $\$ 30,000-\$ 39,999$ | $\$ 15,000$ | $\$ 100,000-\$ 139,999$ |
| $\$ 40,000-\$ 49,999$ | $\$ 20,000$ | $\$ 140,000-\$ 199,999$ |
| $\$ 50,000-\$ 74,999$ | $\$ 25,000$ | $\$ 200,000-\$ 299,999$ |
| $\$ 75,000-\$ 99,999$ | $\$ 30,000$ | $\$ 300,000-\$ 399,999$ |
| $\$ 100,000$ And Over | $\$ 35,000$ | $\$ 400,000+$ |

Naturally, there are cases where a household can afford a higher down payment to purchase a more expensive home. There are also cases in which households purchase a less expensive home although they could afford a higher purchase price. This broad analysis provides the basis in which to estimate the potential demand for for-sale housing.

The following is a narrative of each supply and demand component considered in this analysis of for-sale housing:

- New owner-occupied household growth within a market is a primary demand component for demand for new for-sale housing. For the purposes of this analysis, we have evaluated growth between 2010 and 2015. The 2010 households by income level are based on ESRI estimates applied to 2010 Census estimates of total households for each study area. The 2015 estimates are based on growth projections by income level by ESRI. The difference between the two household estimates represents the new owneroccupied households that are projected to be added to a study area between 2010 and 2015. These estimates of growth are provided by each income level and corresponding price point that can be afforded.
- Replacement of functionally obsolete housing is a demand consideration in most established markets. Given the limited development of new housing units in many rural areas, homebuyers are often limited to choosing from the established housing stock, much of which is considered old and/or often in disrepair and/or functionally obsolete. There are a variety of ways to measure functionally obsolete housing and to determine the number of units that should be replaced. For the purposes of this analysis, we have applied the highest share of any of the following three metrics: cost burdened households, units lacking complete plumbing facilities, and overcrowded units. This resulting housing replacement ratio is then applied to the existing (2010) owner-occupied housing stock to estimate the number of for-sale units that should be replaced in the study areas.

## 1. Rental Housing

Region 6 is located in the east portion of the state of Texas. This region includes four counties which were classified as rural and were included in this analysis. The following tables summarize the housing gaps by AMHI and county for this region:

|  | County Level Rental Housing Gap |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Target Income |  |  | $\mathbf{5 1 \% - \mathbf { 8 0 \% }}$ |
| $\mathbf{0 \% - 3 0 \%}$ | $\mathbf{3 1 \% - 5 0 \%}$ | Total |  |  |
| Colorado County | 227 | 91 | 117 | 436 |
| Matagorda County | 562 | 301 | 71 | 934 |
| Walker County | 1,595 | 794 | 759 | 3,148 |
| Wharton County | 786 | 364 | 415 | 1,565 |
| Region Total | 3,171 | 1,550 | 1,363 | 6,083 |
