		1b	Obtain up to a living wage job	Once achieved, automatically enrolled in FNPI 1c

		7a	Outcomes across multiple domains	<p>Should not be a selection. The software should auto-calculate based on individuals who received one or more outcomes then remove duplicate individuals to provide the unduplicated count of individuals who obtained an outcome.</p> <p>(Similar to how unduplicated individuals are reported in demographics and are calculated in the software)</p>	<p><b>Outcomes across Multiple Domains Overview:</b>            Outcomes across Multiple Domains indicators collect data on the unduplicated number of individuals who achieve one or more of the outcomes reported throughout any of the domains as a result of a CSBG Eligible Entity. An individual who obtained employment (FNPI 1b) and a certificate or diploma (FNPI 2g) may be reported in each of those indicators and reported here once. An individual who obtained only one outcome may be reported in that indicator and also be reported here once.</p> <p>This indicator will provide data on how many individuals achieved one or more of the FNPIs. This will allow for better understanding of the number of individuals with low incomes who were helped to become stable and achieve economic security. This is different than adding up all the FNPI numbers which would show the total number of outcomes achieved rather than the number of individuals who obtained the outcomes.</p>
