### Regulatory Tool: Reducing minimum lot size or minimum unit size requirements

**How does it work?**
Zoning bylaws that require large (\(\geq 2\) acres per dwelling unit) minimum lot sizes for the developable land in the municipality can discourage the development of affordable housing. Large minimum lot sizes require developers to acquire more land, inflating the costs of development, which are passed on to residents. Similarly, unnecessarily large minimum unit sizes can prohibit developers from building smaller, lower-cost housing units.

**Examples of where it has been used**
- Burlington, Colchester, Enosburg, Enosburg Falls, Essex, Essex Junction, Franklin, Grand Isle, Highgate, Hinesburg, Montgomery, Richford, Richmond, South Burlington, South Hero, St. Albans City, St. Albans Town, Swanton, Winooski
- King County, Washington; Erie County, New York; Los Angeles, California; Seattle, Washington; Cincinnati, Ohio

- [U.S. Department of Housing and Urban Development](https://www.hud.gov)

### Regulatory Tool: Zoning for multi-family housing

**How does it work?**
Zoning bylaws that do not permit multi-family housing limit developers in affordable housing options. Revising zoning laws to allow a wide variety of housing types can create more flexibility in meeting a community's changing housing needs. Zoning for multi-family unit housing can be accompanied by tax incentives encouraging the development of multi-unit housing.

**Examples of where it has been used**
- Bakersfield, Berksire, Bolton, Burlington, Charlotte, Colchester, Enosburg, Enosburg Falls, Essex, Essex Junction, Fairfax, Fletcher, Franklin, Georgia, Grand Isle, Highgate, Hinesburg, Huntington, Jericho, Milton, Montgomery, North Hero, Richford, Richmond, Shelburne, Sheldon, South Burlington, South Hero, St. Albans City, St. Albans Town, St. George, Swanton, Underhill, Westford, Winooski
- State of Massachusetts; New York City; Fremont, California; Seattle, Washington

- [Connecticut Fair Housing Center](https://www.cfhc.org)

### Regulatory Tool: Separating density from unit size

**How does it work?**
A zoning bylaw that considers dwelling units of different sizes differently in terms of density. Instead of treating all dwelling units the same when determining maximum density, greater numbers of smaller units could be allowable. This may often be seen in low-income housing for the elderly, which may allow smaller unit sizes in exchange for shared community spaces within a development. Alternatively, zoning bylaws can set a housing unit as being a specific area (e.g. 1500 square feet). Municipalities may expand zoning requirements to allow for micro-units or compact units in some instances.

**Examples of where it has been used**
- Los Angeles, California; New York City; Portland, Oregon; Seattle, Washington

**Additional Resources**

- [City of Oregon Bureau of Planning](https://www.ci.portland.or.us)
- [NYU Furman Center](https://furmancenter.nyu.edu)

### Regulatory Tool: Separating density from unit type

**How does it work?**
A zoning bylaw that disconnects automatically allowing large multi-family buildings in higher-density districts, instead allowing high density but only as single or two-family homes. This may be seen in cottage housing developments. It may also overlap with cluster development practices.

**Examples of where it has been used**
- Suffolk County, New York; Kirkland, Washington; Seattle, Washington; Cleveland, Ohio; Juneau; Alaska

<tbody>
<tr>
<td>Promoting the development of accessory dwelling units (ADUs)</td>
<td>Additional living quarters on single-family lots that are independent of the primary dwelling unit. ADUs can offer more options for affordable housing, as they can be inexpensively constructed and do not require additional land for development. According to Vermont law (24 VSA §4412), municipalities must allow accessory dwelling units. However, municipalities may choose to adjust local bylaws to encourage the construction of ADUs.</td>

<td>American Planning Association; National Association of Home Builders; Vermont Natural Resources Council; District of Columbia Office of Zoning; City of Burlington Department of Planning and Zoning</td>
</tr>
<tr>
<td>Planned unit development (PUD) ordinances</td>
<td>Municipal regulations that allow developers exemptions from certain zoning requirements in exchange for developing properties with desirable criteria. Some municipalities include PUDs within overlay districts. By allowing greater flexibility in the configuration of buildings on a site or allowing mixed usage of a site, a municipality can encourage more creative and efficient use of a space than is typically allowed in local zoning laws. It can also result in lower infrastructure costs and better coordination of development across an area. Municipalities can choose to make affordable housing a condition for allowing PUDs.</td>
<td>Bakersfield, Berkshire, Bolton, Burlington, Charlotte, Colchester, Enosber, Enosberg Falls, Essex, Essex Junction, Fairfax, Fairfield, Fletcher, Franklin, Georgia, Grand Isle, Highgate, Hinesburg, Huntington, Jericho, Milton, Montgomery, North Hero, Richford, Richmond, Shelburne, Sheldon, South Burlington, South Hero, St. Albans City, St. Albans Town, St. George, Swanton, Underhill, Westford, Winooski</td>

<td>Municipal Research and Services Center; National Association of Home Builders; University of Wisconsin Center for Land Use Education; Michigan State University Extension; Puget Sound Regional Council</td>
</tr>
<tr>
<td>Cluster developments (AKA conservation-oriented development)</td>
<td>Zoning methods in which development density regulations are determined for an entire specified area (instead of a lot-by-lot basis). This allows the developer greater flexibility in designing projects but preserves the overall density in an area. Cluster developments allow many smaller units to be constructed in a designated area of a lot. This can naturally encourage the construction of smaller, low-cost housing units, but municipalities can also require affordable housing to be developed as a condition of approval for adjusting density requirements. It also has the benefit of preserving open spaces and protecting natural resources. Cluster development is similar to PUDs, but typically limited to housing use.</td>
<td>Bakersfield, Berkshire, Bolton, Burlington, Charlotte, Colchester, Enosber, Enosberg Falls, Essex, Essex Junction, Fairfax, Fairfield, Fletcher, Georgia, Grand Isle, Highgate, Hinesburg, Huntington, Jericho, Milton, North Hero, Richford, Richmond, Shelburne, Sheldon, South Burlington, South Hero, St. Albans City, St. Albans Town, St. George, Swanton, Underhill, Westford, Winooski</td>
<td>King County, Washington; New York City; Seattle, Washington; Amherst, Massachusetts; Truro, Massachusetts; Medford, Oregon</td>
<td>National Association of Home Builders; State of New York Office for the Aging; Town of Truro Housing Authority; City of Medford</td>
</tr>
<tr>
<td>Abide by &quot;as of right&quot; development (AKA &quot;by right&quot; development)</td>
<td>Allowing building proposals that fit within the specifications of local zoning policies to proceed &quot;as of right&quot;, without additional review. Developers still need to secure a building permit and fulfill customary regulatory requirements, but the approvals process is generally less contentious and/or time-consuming than the process for proposals that require an exception from current zoning regulations. Through the revision of zoning policies, jurisdictions can significantly broaden the types of housing that are allowed as of right, thus simplifying and reducing the cost and time of delivering homes that are more likely to be available to working families.</td>
