A Regulatory Database Report
B Maps, Aerial Photographs, and Reference Materials
C Correspondence
Aspen Environmental, Inc. (Aspen) performed a Phase I Environmental Site Assessment (ESA) of the 1.23-acre property located to the north of Center Street and to the east of Moy Street near Houston, Texas. This property has historically been developed with apartments or residences and is located in an area characterized by other apartment communities and commercial and retail buildings. This property will be referred to hereafter in this report as “the subject site.”

1.1 FINDINGS AND OPINIONS

The following sections describe Aspen’s findings and provide general background information about the site. Findings include recognized environmental conditions, historical recognized environmental conditions, and de minimis quantities, as applicable to the site.

1.1.1 Historical Information

Based on interviews and Aspen’s review of available historical aerial photographs and topographic maps, the subject site has been developed with apartments, residences and small businesses since at least 1944. This included a sheet metal shop on the southwestern portion of the property. No recognized environmental conditions were identified in our review of historical information for the subject property and nearby areas.

1.1.2 On-site Findings

A site reconnaissance visit and review of the site’s history were used to identify potentially hazardous substances and petroleum products at the subject site. Specific findings are summarized below.

- Our review of site conditions and history identified past or current environmental conditions. Past property occupants included commercial businesses such as J&L Sheet Metal on the southeastern portion of the property. All buildings and residences were removed from the property between 2010 and 2016. No hazardous materials were observed at the subject property in February 2020.

- Based on Aspen’s review of agency records, the subject property appears on two agency databases reviewed. These records indicate that J&L Sheet Metal had an underground storage tank removed in 1991 and that minor soil contamination was identified at that time. The state environmental agency concluded that the regulatory case should be closed on this release of petroleum products at the time of tank removal.
1.1.3 Off-site Findings

Nearby properties are mostly commercial or residential in nature. Apartment buildings, townhomes and residences were noted in all directions from the subject property. No other environmental concerns were noted at nearby properties that would likely impact the subject property.

1.2 CONCLUSIONS AND RECOMMENDATIONS

Aspen has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of the proposed Heritage Senior Residences Development Site property located near the intersection of Center Street and Moy Street in Houston, Texas, “the property”. Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property, except as noted below.

J&L Sheet Metal on the subject property appeared on the petroleum storage tank (PST) and leaking PST lists for a release of petroleum products that impacted soil only. We recommend that the TCEQ file be reviewed to determine the extent of the release and the testing and remediation associated with the clean-up of this release.

No other assessment for environmental conditions is recommended at this time.
2.0 INTRODUCTION

2.1 PURPOSE

Aspen performed a Phase I ESA of the subject site. This report will be used to assist Texas Department of Housing and Community Affairs (TDHCA) and Heritage Senior Residences, LP in understanding environmental conditions associated with the subject site’s past and current use. Aspen performed this Phase I ESA in general accordance with the scope and limitations of the ASTM Standard Practice E 1527-13 Phase I Environmental Site Assessments: Environmental Site Assessment Process.

The purpose of this assessment is to assist the client in identifying “recognized environmental conditions” at the site. A recognized environmental condition is defined by the ASTM standard as:

“the presence or likely presence of hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.”

2.2 REPORT ORGANIZATION

The following presents a listing of the remaining sections of this report:

- Section 3.0, Site Setting, summarizes information concerning the site’s location, legal description (if available), current and proposed use of the site, a description of structures and improvements on site at the time of Aspen’s assessment, and current uses of adjoining properties.

- Section 4.0, Records Review, is a compilation of Aspen’s review of several databases available from federal, state, and local regulatory agencies regarding hazardous substance use, storage, or disposal at the site; and for off-site facilities up to a mile radius from the site, depending on the searched database. Environmental liens or activity and use limitations are included in this chapter. Relevant notes of interviews and/or telephone conversations performed by Aspen with people knowledgeable about the site (including the client and local regulatory personnel) are included in Section 7.0.

- Section 5.0, History of the Site, summarizes the history of the site and adjoining properties. This information is based on various sources, which may include a review of
topographic maps, building department records, previous assessments, and a chain-of-title/preliminary title report (if provided by the client).

- Section 6.0, **Site Reconnaissance**, describes Aspen’s site observations during the site reconnaissance. The methodology used and limiting conditions are described.

- Section 7.0, **Interviews**, is a summary of telephone and personal interviews conducted with “Key Managers” that may include the owner/manager of the facility, occupants/tenants, local government officials, and the client. Additional interview sources may be contacted if “Key Managers” are not available prior to production of this report, and include adjacent landowners and people with historical knowledge of the area.

- Section 8.0, **Environmental Professional Statement**, contains qualifications information about the environmental professional who prepared this report.

- Section 9.0, **References**, is a summary of the resources used to compile this report.

Discussion of on-site and off-site findings and our conclusions are provided in Section 1.0 and Section 2.0 includes a report introduction and the limitations associated with the assessment. Pertinent documentation regarding the site is included in the Appendices of this report.

### 2.3 LIMITATIONS AND EXCEPTIONS

Phase I ESAs are non-comprehensive by nature and are unlikely to identify all environmental problems or eliminate all risk. This report is a qualitative assessment. Aspen offers a range of investigative and engineering services to suit the needs of our clients, including more quantitative investigations. Although risk can never be eliminated, more detailed and extensive investigations yield more information, which may help the client understand and better manage risks. Since such detailed services involve greater expense, we ask our clients to participate in identifying the level of service that will provide them with an acceptable level of risk.

Aspen performed this environmental assessment in general accordance with the guidelines set forth in the ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (Designation E-1527-13). No warranty, either express or implied, is made. This Phase I ESA does not incorporate considerations such as wetlands/ecological resources/endangered or threatened species evaluations. Environmental issues not specifically addressed in the report were beyond the scope of our services and not included in our evaluation.

Land use, site conditions (both on the site and off of the site), and other factors will change over time. Since site activities and regulations beyond our control could change at any time after the completion of this report, our observations, findings, and opinions can be considered valid only as of the date of the site visit. This report should not be relied upon after 180 days from the date of its issuance (per ASTM Standard E 1527-13, Section 4.6).
as of the date of the site visit. This report should not be relied upon after 180 days from the date of its issuance (per ASTM Standard E 1527-13, Section 4.6).

This report has been prepared for the exclusive use of Heritage Senior Residences, LP under mutually agreeable terms and conditions. No other parties may rely on this report without the express written permission of Aspen and Heritage Senior Residences, LP. We understand that this report will be used as part of an application package for evaluation by the Texas Department of Housing and Community Affairs (TDHCA). The TDHCA may also rely upon this report as part of their evaluation.

Aspen Environmental has read and understands the requirements of Section 11.305 of the QAP, as prepared by the TDHCA Real Estate Analysis Division. This report has been prepared in accordance with these sections and rules. All persons who have a property interest in this report hereby acknowledge that the Department may publish the full report on the Department's website, release the report in response to a request for public information and make other use of the report as authorized by law.

Aspen Environmental, as preparer this ESA report, will not materially benefit from the Development in any other way than receiving a fee for performing the Environmental Site Assessment, and this fee is in no way contingent upon the outcome of the assessment.

All persons who have a property interest in this report hereby acknowledge that TDHCA may publish the full report on TDHCA's website, release the report in response to a request for public information and make other use of the report as authorized by law.
3.0 SITE SETTING

The site setting is presented to summarize general conditions observed during our assessment including site improvements and surrounding land uses. The site location is shown on Figure 1. Tables 1 through 5 provide the physical characteristics of the site and bordering properties.

3.1 LOCATION AND LEGAL DESCRIPTION

The information presented in Table 1 describes the physical location and legal description of the site. This information was obtained from maps, public records, and interviews.

| TABLE 1 |
| LOCATION AND PROPERTY INFORMATION |
| SITE LOCATION | A city block located northeast of the intersection of Center Street and Moy Street in Houston, Texas |
| ACREAGE | 1.23 acres |
| OWNER | 2015 MHI Land Holdings LLC |
| PROPERTY LEGAL DESCRIPTION | "All of Block 2 Amended Moy Studer Addition to the City of Houston according to the map or plat thereof recorded in Volume 5, Page 66 of the Map Records of Harris County, Texas..." |

3.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The subject site is located in an area characterized generally by apartments, condominiums and commercial buildings. The subject property is covered with grass and some trees and is generally flat with a gentle regional gradient down to the south towards Buffalo Bayou.

3.3 CURRENT/PROPOSED USE OF THE PROPERTY

The subject site presently consists of 1.23 acres of undeveloped land located to the northeast of the intersection of Center Street and Moy Street in Houston, Texas. The property is currently undeveloped and covered with grass and some trees. The subject site’s current and proposed uses are summarized in Table 2.
TABLE 2
CURRENT/PROPOSED USES

<table>
<thead>
<tr>
<th>CURRENT USE</th>
<th>The subject property is currently undeveloped and covered with grass and trees.</th>
</tr>
</thead>
<tbody>
<tr>
<td>PROPOSED USE</td>
<td>Heritage Senior Residences, LP intends to develop the property with an affordable housing community.</td>
</tr>
</tbody>
</table>

3.4 DESCRIPTION OF STRUCTURES/IMPROVEMENTS

Structures and/or improvements observed on the subject site at the time of Aspen’s site reconnaissance are described in Table 3. Photographs 1 through 6 show various views of the subject property.

<tr>
<td>SOUTH</td>
<td>The subject property is bordered on the south side by Center Street. Apartments or condominium buildings occupy the block to the south of Center Street.</td>
</tr>
<tr>
<td>WEST</td>
<td>The subject property is bordered on the west side by Moy Street. Apartments and residences were noted to the west of Center Street. A restaurant and commercial/retail center are located to the southwest of the property.</td>
</tr>
<tr>
<td>SUMMARY</td>
<td>The general use of properties in the area of the subject property is mostly apartments/condominiums, commercial buildings, or residential.</td>
</tr>
</tbody>
</table>
3.6 PHYSICAL SETTING

Table 5 presents information about the physical setting of the site. This information was obtained from published data or maps, interviews with public agencies, and/or from previous investigations performed by Aspen in the vicinity of the site. References are provided in Section 9.0.

<table>
<thead>
<tr>
<th>PARAMETER</th>
<th>INFORMATION/COMMENTS</th>
<th>SOURCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>REGIONAL GEOLOGY</td>
<td>The subject property is located over clay, silt, and sand deposits of the Pleistocene age Beaumont Formation. The Beaumont Formation is one of many formations that comprise the Coastal Lowlands aquifer system. The lithology of the Beaumont Formation reflects three depositional environments - alluvial plain, transitional (delta, lagoon, and beach), and marine (continental shelf). The gradual subsidence of the depositional basin and the relative rise of the land surface caused the deposits to thicken toward the Gulf of Mexico. In addition, oscillations of the ancient shoreline have resulted in a complex, overlapping mixture of sand, silt, and clay.</td>
<td>Geologic Atlas of Texas – Houston Sheet, University of Texas at Austin, Bureau of Economic Geology, 1982</td>
</tr>
<tr>
<td>ELEVATION</td>
<td>The subject property elevation is about 54 feet above the National Geodetic Vertical Datum of 1929. The local topographic gradient slopes down to the south towards Buffalo Bayou.</td>
<td>U.S. Geological Survey, 7.5-minute topographic map of Houston Heights, Texas, dated 2013</td>
</tr>
<tr>
<td>SOIL TYPES</td>
<td>The soils present at the subject property have been classified by others as Bernard-Urban land complex. The Bernard series consists of very deep, somewhat poorly drained soils that formed in clayey fluvio marine deposits of the Beaumont Formation. These soils are on flats on flat coastal plains. Urban land describes soils that have been altered by development and are typically covered buildings streets and sidewalks. This classification does not retain the characteristics of the pre-development soil.</td>
<td>Soil Survey of Harris County, Texas, USDA, reviewed online at Natural Resources Conservation Service Web Soil Survey</td>
</tr>
</tbody>
</table>

3.7 HYDROGEOLOGIC CONDITIONS

Information regarding hydrogeologic conditions is summarized in Table 6 below and supports our assessment of the potential for contaminants from nearby off-site locations to migrate towards the subject site.
<table>
<thead>
<tr>
<th>PARAMETER</th>
<th>INFORMATION/COMMENTS</th>
<th>SOURCE</th>
</tr>
</thead>
</table>
| DEPTH TO LOCAL GROUNDWATER      | Shallow groundwater is anticipated to be encountered within about 20 feet of the ground surface in this area of Houston.  
Fluctuations of the groundwater level, localized zones of perched water, and soil moisture content should be anticipated during and following the rainy season. Irrigation of landscaped areas on or adjacent to the site can also cause a fluctuation of local groundwater levels. | Public information and general knowledge                                                          |
| REGIONAL AQUIFER INFORMATION    | The Beaumont Formation is a unit of the Chicot Aquifer (classified as Permeable Zones A and B of the Coastal Lowlands aquifer system). The aquifer is recharged by direct infiltration of precipitation on aquifer outcrop areas. With the exception of shallow ground-water zones, the ground water is under confined conditions. Producing fresh water sands range in thickness from zero feet at the updip limit of the aquifer to hundreds of feet thick near the Gulf of Mexico. | Ground Water Atlas of the United States – Segment 4: Oklahoma, Texas; USGS Hydrologic Investigations Atlas 730-E, 1996 |
| REGIONAL GROUNDWATER FLOW DIRECTION | The regional topographic gradient slopes down to the south towards Buffalo Bayou. Based on topographic clues, the groundwater flow direction at the subject site is assumed to be to the south.  | USGS, 7.5-minute topographic maps of Satsuma, Texas, dated 1995 and 2013                           |
| FLOOD PLAIN                      | The FEMA Flood Insurance Rate Map (FIRM) was reviewed for the subject property area, and is included in Appendix B. According to the FEMA map, the subject property is mapped as “Zone X”, an area outside of the 500-year flood plain. | Flood Hazards Map 48201C0670M (effective date June 9, 2014) Federal Emergency Management Agency |

NOTE: Groundwater flow direction is based on regional information sources. Site-specific conditions may vary due to a variety of reasons including geologic anomalies, utilities, nearby pumping wells (if present), and other factors.
3.8 RADON GAS

Radon is an odorless, colorless, naturally occurring radioactive gas that is produced from the radioactive decay of radium. Radon further decays into radioactive, chemically reactive particles that can attach themselves to other particles such as dust in a home environment. If inhaled, these radioactive particles may cause damage to lung tissues and increase the risk of lung cancer. The EPA has established a threshold level of concern of 4 picocuries per liter of air (pCi/L). The Texas Department of Health (TDH) Bureau of Radiation Control, in cooperation with the U.S. EPA, performed a statewide survey of radon gas. The results of this survey were published in a document entitled Preliminary Report of the Texas Indoor Radon Survey – 1992. 131 samples were collected from homes in Harris County. The mean value for radon in these samples was less than 0.5 pCi/L, with a maximum measured reading of 3.8 pCi/L. Based on the testing results, Harris County does not show an elevated potential for indoor radon.

3.9 WETLANDS

The U.S. Fish and Wildlife Service (USFWS) Wetlands Online Mapper was consulted to identify mapped wetlands in the area. The USFWS data map (see Figure 5) does not indicate mapped wetlands features on the subject property. No evidence of wetlands features were noted on this city block in an urban setting.

3.10 NOISE SOURCES

The subject property is located in an area characterized by residential and commercial uses and schools and parks. It is generally away from industrial zones, active rail lines, civil and other sources of excessive noise. Based on available information on obvious noise sources, we do not recommend a noise assessment for this site to determine if the community design should be adjusted for potential noise sources.

3.11 VAPOR INTRUSION

Aspen performed a vapor encroachment screening in accordance with ASTM Standard E2600-10. The subject property is undeveloped with among adjacent residential apartments and no on-site sources of vapor intrusion were observed or reported.

3.12 OIL AND GAS PIPELINES, WELLS OR FACILITIES

Our regulatory review and reconnaissance activities did not identify oil, gas or chemical pipelines, processing facilities, storage facilities or other potentially hazardous explosive activities on-site or in the general area of the site that could potentially adversely impact the proposed development.

3.13 TESTING FOR OTHER ENVIRONMENTAL ISSUES

Due to the undeveloped nature of the property, no further testing for asbestos, lead paint, or lead in drinking water is recommended at this time.
4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

The purpose of the records review is to obtain and review records that would help to evaluate recognized environmental conditions in connection with the site and bordering properties. Aspen reviewed databases available from the federal, state, and local regulatory lists. The database extraction was performed by GeoSearch, and the results are summarized below in Table 7, and a map of identified facilities is included as Figure 3. The entire GeoSearch report is included in Appendix A.

GeoSearch utilizes a geographical information system to plot the locations of reported incidents. This information is reviewed by Aspen to help establish if the site or nearby properties have been included in the noted databases and lists. The GeoSearch report includes maps that show the locations of the affected properties with respect to the site and a summary of pertinent information for these properties. The summaries include the name of the responsible party, the property address, the distance and direction from the approximate center of the subject site, and the databases and lists on which the property appear.

Due to lack of sufficient address information, Banks was unable to map several facilities with reported releases. These “unmappable” sites were reviewed to identify nearby facilities of concern. No nearby facilities included on the unmappable list are considered environmental concerns.

**Subject Site**
The subject site address is included on two of the regulatory databases researched and listed above. J&L Sheet Metal is listed at 1101 Reinerman Street, which corresponds to the southeastern portion of the subject property. J&L Sheet Metal is included on the Texas Commission on Environmental Quality (TCEQ) list of registered petroleum storage tanks (PSTs) and the TCEQ list of Leaking PSTs. The databases indicate that a single 250-gallon underground storage tank that held kerosene was installed at J&L Sheet Metal in 1956. When the UST was removed in 1991, soil contamination was identified that did not require a remedial action plan and the LPST case had final concurrence of closure from the TCEQ. It appears that this was a minor release over 30 years ago. We recommend review of the regulatory file to confirm the sample results from the LPST incident.
Surrounding Area
Numerous listed sites were identified in the surrounding area within each list’s specified search distance, as summarized below.

Leaking Petroleum Storage Tank (LPST) Facilities
The Texas Commission on Environmental Quality (TCEQ) maintains this list of facilities that have had documented releases from PSTs. Twelve additional sites appear on the LPST list within 0.5 mile of the subject property, as summarized below.

</tbody>
</table>
All but one of the listed LPST facilities have received final TCEQ concurrence of “case closed” status. The last LPST site has pending final concurrence once documentation of well plugging is provided. Based on the current regulatory status and distance of the listed LPST facilities, they are not recognized environmental conditions for the subject property.

**Voluntary Cleanup Program (VCP) Sites**

As regulated by the TCEQ, the VCP provides administrative, technical and legal incentives to encourage the cleanup of contaminated sites in Texas. Since all non-responsible parties, including future landowners, receive protection from liability to the State of Texas for cleanup of sites under the VCP, most of the constraints for completing real estate transactions at those sites are eliminated. As a result, many unused or underused properties may be restored to economically productive or community beneficial uses.

One VCP site is located within 0.5 mile of the subject property and is listed twice, as summarized below.

<table>
<thead>
<tr>
<th>Facility Name and Address</th>
<th>Distance and Direction From Subject Property</th>
<th>Database Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Former Leroy's Auto Parts</td>
<td>0.14 mile west</td>

</tr>
<tr>
<td>5430 Washington Avenue</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Former Leroy's Auto Parts</td>
<td>0.14 mile west</td>
<td>This site was re-entered into the VCP in 2014 as a site with soil contamination by metals, and petroleum products. Excavation and removal was used to meet the requirements for a certificate of completion in 2015.</td>
</tr>
<tr>
<td>5430 Washington Avenue</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Based on the distance and current regulatory status, the Former Leroy's Auto Parts VCP site it is not a recognized environmental condition for the subject property.

**RCRA Corrective Action (CORRACTS) Facilities**

The Resource Conservation and Recovery Act (RCRA) established a system for registering the generation, storage and transportation of hazardous wastes in America. The CORRACTS list identifies sites that identifies hazardous waste sites undergoing corrective action to meet state or federal clean-up requirements. This list is maintained by the EPA.
One RCRA CORRACTS facility is located within one mile of the subject property, as summarized below.

<table>
<thead>
<tr>
<th>Facility Name and Address</th>
<th>Distance and Direction From Subject Property</th>

</tr>
</tbody>
</table>

Based on the distance and current regulatory status, the Central Industrial Park site it is not a recognized environmental condition for the subject property.

**“Orphan” Sites**
Due to lack of sufficient address information, GeoSearch was unable to map several facilities with reported releases. This “orphan” sites list was reviewed to identify nearby facilities of concern. Based on available information, no nearby incidents or facilities included on the orphan sites list are considered environmental concerns.

**4.2 USER-PROVIDED INFORMATION**
The current owner of the subject property provided a Phase I ESA report for the subject property prepared by SMC Consulting dated February 2014. This report documented site conditions when the J&L Sheet Metal facility was present. The SMC report described on-site buildings including “a metal fabrication shop, storage yard, and two houses”. An interview with the President of J&L Sheet Metal indicated that the residences on the property had been occupied by numerous generations of his family and that the sheet metal company had been added to the once residential block in the 1950s, 1960s and 1990s. The SMC report also included review of Sanborn Fire Insurance Maps from 1925, 1950 and 1969. The first two maps showed only residences on the subject property. The 1969 map showed residences and the sheet metal company. The SMC report identified some surface staining in the on-site buildings and recommended testing of these stained areas. However, these stained areas were removed when the buildings were removed between 2014 and 2016.
5.0 HISTORICAL USE OF THE PROPERTY AND ADJOINING PROPERTIES

The history of the site was researched to identify obvious uses of the site from the present to first developed use, or back to 1935; whichever is earlier, from readily available resources. Table 8 summarizes the availability of information reviewed during this assessment.

<table>

5.1 AERIAL PHOTOGRAPHY

Historical aerial photographs were reviewed to evaluate past land use at the site and in the surrounding area. Aerial photographs going back to 1944 were available for this report. Copies of the aerial photographs are provided in Appendix B. The summary of the aerial photograph review is presented in Table 9 below.

</table>
Subject Site

The aerial photographs from 1944 to 2010 show the property as developed with either residences or commercial buildings. The 2016 photograph shows the property as undeveloped with no structures, similar to conditions noted in the 2020 site visit.

Surrounding Areas

The 1944 to 2016 aerial photographs show the subject property area an urban area with residences, apartments and commercial buildings.

The 2016 aerial photograph shows conditions similar to those observed in February 2020.

No environmental concerns were identified in our review of historical aerial photographs.

5.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance Maps provide historical land use information for some metropolitan and small, established towns. Historical fire insurance maps were not reviewed for the subject property area for this report. See Section 4.2 for discussion of maps from 1925, 1950 and 1969.

5.3 HISTORICAL TOPOGRAPHIC MAP REVIEW

Available topographic maps from 1998 and 2013 were reviewed for the subject property area. According to this map, the subject property was in an urban area and relatively flat. The map did not indicate the presence of gravel pits or landfills in the area of the subject property. No environmental concerns were identified for the subject property during our review of the topographic maps.

Aspen notes that topographic maps only provide information on indications of land use and no conclusions can be drawn from them alone. No apparent discrepancies in features were observed on historical topographic maps relative to the historical aerial photographs reviewed. No map features were observed that would directly point to potential recognized environmental conditions at the subject site or immediate surrounding area.

5.4 HISTORICAL CITY DIRECTORIES

City directories include listings of residents and businesses alphabetically by name and alphanumerically by street name and then specifically by street address. Because of undeveloped nature of the subject property, city directories were not reviewed for this property.
6.0 SITE RECONNAISSANCE

6.1 METHODOLOGY AND LIMITING CONDITIONS

Mr. Mitchell Young of Aspen performed a site reconnaissance visit on February 10, 2020, to assess and photograph present site conditions. The subject site location is shown on a topographic map as Figure 1. The approximate site boundaries and surrounding property uses are shown on Figure 2. The site conditions discussed below are limited to readily apparent environmental conditions observed.

6.2 SITE OBSERVATIONS

The subject site presently consists of 1.23 acres of undeveloped land that is covered with grass and some trees. The property was apparently previously utilized for residential and commercial uses. Most recently, J&L Sheet Metal occupied the southwestern portion of the property. No structures have been present since at least 2016. No hazardous materials or refuse was noted on the property, which has a construction fence limiting access. Photographs 1 through 6 show the property and surrounding areas in February 2020.

No underground storage tanks, pipelines, water wells, or other wells were identified at the subject property.

Site observations are described further in Table 10. Further details regarding our observations follow the table.

6.3 ADJACENT SITE OBSERVATIONS

Aspen also observed adjacent and nearby sites for indications of recognized environmental conditions, such as dry cleaners or service stations.

The subject property is bordered on the north side by Nett Street. Apartment or condominium buildings were noted to the north of Nett Street.

The subject property is bordered on the east side by Reinerman Street. Apartments and residences were noted to the north of Reinerman Street.

The subject property is bordered on the south side by Center Street. Apartments or condominium buildings occupy the block to the south of Center Street.

The subject property is bordered on the west side by Moy Street. Apartments and residences were noted to the west of Center Street. A restaurant and commercial/retail center are located to the southwest of the property.

The general use of properties in the area of the subject property is mostly apartments/condominiums, commercial buildings, or residential.

No nearby environmental concerns were identified in our area reconnaissance.
7.0 INTERVIEWS

Aspen attempted to contact key site managers to obtain current and historical environmental information concerning the site. Key site managers may include current or past owners of the site, managers, or current occupants.

Mr. Scott Kriebel of Heritage Senior Residences, LP was interviewed for information about past uses of the site. Mr. Kriebel represents the developer of the property in the pending sale. He indicated that the property has recently been undeveloped, and he was contacting the previous owner to determine past uses of the property. He did not know of any environmental concerns for the subject property.

We contacted the Texas Department of State Health Services (TDSHS) for information about past hazardous materials incidents that may have occurred at the subject property. Our letter is provided in Appendix C. The TDSHS had not responded to our inquiry at the time of our report. If the subsequent TDSHS response changes our findings, we will provide an addendum to this report.
8.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I, Mitchell Young, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in §312.10 of 40 CFR312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed in conformance with the standards and practices set forth in 40 CFR Part 312.

The Phase I Environmental Site Assessment was performed by Mitchell Young on behalf of Aspen Environmental, Inc.’s client, Heritage Senior Residences, LP. Mr. Young is a registered Professional Engineer in Texas. Since 1989, he has performed environmental consulting services for various commercial, industrial, and government clients. His resume is available upon request.

This report was designed by GeoSearch to meet or exceed the records search requirements of the All Appropriate Inquiries Rule (40 CFR §312.26) and the current version of the ASTM International E1527, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process or, if applicable, the custom requirements requested by the entity that ordered this report. The records and databases of records used to compile this report were collected from various federal, state and local governmental entities. It is the goal of GeoSearch to meet or exceed the 40 CFR §312.26 and E1527 requirements for updating records by using the best available technology. GeoSearch contacts the appropriate governmental entities on a recurring basis. Depending on the frequency with which a record source or database of records is updated by the governmental entity, the data used to prepare this report may be updated monthly, quarterly, semi-annually, or annually.

The information provided in this report was obtained from a variety of public sources. GeoSearch cannot ensure and makes no warranty or representation as to the accuracy, reliability, quality, errors occurring from data conversion or the customer's interpretation of this report. This report was made by GeoSearch for exclusive use by its clients only. Therefore, this report may not contain sufficient information for other purposes or parties. GeoSearch and its partners, employees, officers and independent contractors cannot be held liable for actual, incidental, consequential, special or exemplary damages suffered by a customer resulting directly or indirectly from any information provided by GeoSearch.

Unlocated Sites Summary

This list contains sites that could not be mapped due to limited or incomplete address information.

No Records Found
AIRSAFS  
Aerometric Information Retrieval System / Air Facility Subsystem  
VERSION DATE: 10/20/14

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

BRS  
Biennial Reporting System  
VERSION DATE: 12/31/15

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The Biennial Report captures detailed data on the generation of hazardous waste from large quantity generators and data on waste management practices from treatment, storage and disposal facilities. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

CDL  
Clandestine Drug Laboratory Locations  
VERSION DATE: 11/26/19

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

DOCKETS  
EPA Docket Data  
VERSION DATE: 12/22/05

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location. Please refer to ICIS database as source of current data.

EC  
Federal Engineering Institutional Control Sites  
VERSION DATE: 12/19/19

This database includes site locations where Engineering and/or Institutional Controls have been identified as part
of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. The data displays remedy component information for Superfund decision documents issued in fiscal years 1982-2017, and it includes final and deleted NPL sites as well as sites with a Superfund Alternative Approach (SAA) agreement in place. The only sites included that are not on the NPL, proposed for NPL, or removed from proposed NPL, are those with an SAA Agreement in place. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination.

ECHOR06  Enforcement and Compliance History Information  
VERSION DATE: 10/27/19

The U.S. Environmental Protection Agency’s Enforcement and Compliance History Online (ECHO) database, provides compliance and enforcement information for facilities nationwide. This database includes facilities regulated as Clean Air Act stationary sources, Clean Water Act direct dischargers, Resource Conservation and Recovery Act hazardous waste handlers, Safe Drinking Water Act public water systems along with other data, such as Toxics Release Inventory releases.

ERNSTX  Emergency Response Notification System  
VERSION DATE: 10/06/19

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRSTX  Facility Registry System  
VERSION DATE: 10/09/19

The United States Environmental Protection Agency’s Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

HMIRSR06  Hazardous Materials Incident Reporting System  
VERSION DATE: 11/20/19

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.
### ICIS
Integrated Compliance Information System (formerly DOCKETS)

**VERSION DATE: 09/21/19**

ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

### ICISNPDES
Integrated Compliance Information System National Pollutant Discharge Elimination System

**VERSION DATE: 07/09/17**

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States. This database is provided by the U.S. Environmental Protection Agency.

### LUCIS
Land Use Control Information System

**VERSION DATE: 09/01/06**

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

### MLTS
Material Licensing Tracking System

**VERSION DATE: 06/29/17**

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements. Disclaimer: Due to agency regulations and policies, this database contains applicant/licensee location information which may or may not be related to the physical location per MLTS site.

### NPDES06
National Pollutant Discharge Elimination System

**VERSION DATE: 04/01/07**

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States. The NPDES database was collected from the U.S. Environmental Protection Agency (EPA) from December 2002 through April 2007. Refer to the PCS and/or ICIS-NPDES database as source of current data. This database includes permitted facilities located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.
PADS  
PCB Activity Database System
VERSION DATE: 09/14/18

PADS identifies generators, transporters, commercial storers and/or brokers and disposers of Polychlorinated Biphenyls (PCB) who are required to notify the U.S. Environmental Protection Agency of such activities.

PCSR06  
Permit Compliance System
VERSION DATE: 08/01/12

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels. This database includes permitted facilities located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas. PCS has been modernized, and no longer exists. National Pollutant Discharge Elimination System (ICIS-NPDES) data can now be found in Integrated Compliance Information System (ICIS).

RCRASC  
RCRA Sites with Controls
VERSION DATE: 11/22/19

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities with institutional controls in place.

SEMSLIENS  
SEMS Lien on Property
VERSION DATE: 08/13/18

The U.S. Environmental Protection Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs. This is a listing of SEMS sites with a lien on the property.

SFLIENS  
CERCLIS Liens
VERSION DATE: 06/08/12

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States
Environmental Records Definitions - FEDERAL

Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete. Please refer to the SEMSLIENS database as source of current data.

SSTS  Section Seven Tracking System
VERSION DATE: 02/01/17

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

TRI  Toxics Release Inventory
VERSION DATE: 12/31/17

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal and tribal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

TSCA  Toxic Substance Control Act Inventory
VERSION DATE: 12/31/12

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and importer site.

RCRAGR06  Resource Conservation & Recovery Act - Generator
VERSION DATE: 12/30/19

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities currently generating hazardous waste. EPA region 6 includes the following states: Arkansas,
The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities classified as non-generators. Non-Generators do not presently generate hazardous waste. EPA Region 6 includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

This is a listing of FEMA owned underground and aboveground storage tank sites. For security reasons, address information is not released to the public according to the U.S. Department of Homeland Security.

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

This is a listing of drycleaner facilities from the Integrated Compliance Information System (ICIS). The U.S. Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments. The following Primary SIC Codes are included in this data: 7211, 7212, 7213, 7215, 7216, 7217, 7218, and/or 7219; the following Primary NAICS Codes are included in this data: 812320, 812331, and/or 812332.

**MRDS (Mineral Resource Data System)**

MRDS (Mineral Resource Data System) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS.

**MSHA**

The Mine dataset lists all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970. It includes such information as the current status of each mine (Active, Abandoned, NonProducing, etc.), the current owner and operating company, commodity codes and physical attributes of the mine. Mine ID is the unique key for this data. This information is provided by the United States Department of Labor - Mine Safety and Health Administration (MSHA).

**BF**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. The United States Environmental Protection Agency maintains this database to track activities in the various brown field grant programs including grantee assessment, site cleanup and site redevelopment. This database included tribal brownfield sites.

**DNPL**

This database includes sites from the United States Environmental Protection Agency’s Final National Priorities List (NPL) where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL, and final publication in the Federal Register has occurred.

**NLRRCRAT**

This database includes RCRA Non-Corrective Action TSD facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly treated, stored or disposed of hazardous waste.
**ODI**

Open Dump Inventory  
VERSION DATE: 06/01/85

The open dump inventory was published by the United States Environmental Protection Agency. An “open dump” is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

**RCRAT**

Resource Conservation & Recovery Act - Non-CORRACTS Treatment, Storage & Disposal Facilities  
VERSION DATE: 12/30/19

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities recognized as hazardous waste treatment, storage, and disposal sites (TSD).

**SEMS**

Superfund Enterprise Management System  
VERSION DATE: 01/27/20

The U.S. Environmental Protection Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs.

**SEMSARCH**

Superfund Enterprise Management System Archived Site Inventory  
VERSION DATE: 01/27/20

The U.S. Environmental Protection Agency’s (EPA) Superfund Enterprise Management System Archived Site Inventory (List 8R Archived) replaced the CERCLIS NFRAP reporting system in 2015. This listing reflects sites at which the EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program.

**SMCRA**

Surface Mining Control and Reclamation Act Sites  
VERSION DATE: 11/26/19

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type,
and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970’s. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems
that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities with corrective action activity.

Resource Conservation & Recovery Act - Subject to Corrective Action Facilities

VERSION DATE: 12/30/19

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities subject to corrective actions.

**RODS**

Record of Decision System

VERSION DATE: 01/27/20

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.
Environmental Records Definitions - STATE (TX)

GWCC          Groundwater Contamination Cases  
VERSION DATE: 12/31/18

This is a Joint Groundwater Monitoring and Contamination Report provided by the Texas Commission on Environmental Quality (TCEQ). The annual report describes the status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report provides a general overview of groundwater monitoring by participating members on a program by program basis. Groundwater contamination is broadly defined in the report as any detrimental alteration of the naturally occurring quality of groundwater.

HISTGWCC      Historic Groundwater Contamination Cases  
VERSION DATE: 12/31/17

This is a Joint Groundwater Monitoring and Contamination Report provided by the Texas Commission on Environmental Quality (TCEQ) that includes historic groundwater contamination cases reported since 1994. These cases have been closed by a program area or agency, such as the TCEQ, the Railroad Commission of Texas, and/or the Texas Alliance of Groundwater Districts. According to the TCEQ report, although enforcement actions may be closed on these cases, the Activity Status Code descriptions allow that groundwater contamination may still be present at the site and may therefore be of interest to regulatory agencies and the general public.

LANDAPP       Land Application Permits  
VERSION DATE: 06/03/19

Texas Land Application Permits are a requirement from the Texas Commission on Environmental Quality for any domestic facility that disposes of treated effluent by land application such as surface irrigation, evaporation, drainfields or subsurface land application.

LIENS         TCEQ Liens  
VERSION DATE: 06/06/18

Liens filed upon State and/or Federal Superfund Sites by the Texas Commission on Environmental Quality.

MSD           Municipal Setting Designations  
VERSION DATE: 01/16/19

The Texas Commission on Environmental Quality (TCEQ) defines an MSD as an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is not used as potable water, and is prohibited from future use as potable water because that groundwater is contaminated in excess of the applicable potable-water protective concentration level. The prohibition must be in the form of a city ordinance, or a restrictive covenant that is enforceable by the city and filed in the property records. The MSD property can be a single property, multi-property, or a portion of property.
Environmental Records Definitions - STATE (TX)

TCEQ Disclaimer: This data is for informational purposes and may not have been prepared for or be suitable for legal, engineering, or surveying purposes. It does not represent an on-the-ground survey and represents only the approximate relative location of property boundaries.

NOV
Notice of Violations
VERSION DATE: 02/24/16

This database containing Notice of Violations (NOV) is maintained by the Texas Commission on Environmental Quality. An NOV is a written notification that documents and communicates violations observed during an inspection to the business or individual inspected.

SIEC01
State Institutional/Engineering Control Sites
VERSION DATE: 11/20/19

The Texas Risk Reduction Program (TRRP) requires the placement of institutional controls (e.g., deed notices or restrictive covenants) on affected property in different circumstances as part of completing a response action. In its simplest form, an institutional control (IC) is a legal document that is recorded in the county deed records. In certain circumstances, local zoning or ordinances can serve as an IC. This listing may also include locations where Engineering Controls are in effect, such as a cap, barrier, or other engineering device to prevent access, exposure, or continued migration of contamination. The sites included on this list are regulated by various programs of the Texas Commission on Environmental Quality (TCEQ).

SPILLS
Spills Listing
VERSION DATE: 09/19/19

This Texas Commission on Environmental Quality database includes releases of hazardous or potentially hazardous materials into the environment.

TIERII
Tier I I Chemical Reporting Program Facilities
VERSION DATE: 12/31/12

The Texas Tier II Chemical Reporting Program in the Department of State Health Services (DSHS) is the state repository for EPCRA-required Emergency Planning Letters (EPLs), which are one-time notifications to the state from facilities that have certain extremely hazardous chemicals in specified amounts. The Program is also the state repository for EPCRA/state-required hazardous chemical inventory reports called Texas Tier Two Reports. This data contains those facility reports for the 2005 through the 2012 calendar years. Please contact the Texas Commission on Environmental Quality Tier II Chemical Reporting Division as the current source for this data, due to confidentiality and safety reasons details such as the location and capacity of on-site hazardous chemicals is only available to local emergency planning agencies, fire departments, and/or owners.

DCR
Dry Cleaner Registration Database
VERSION DATE: 10/01/19
The database includes dry cleaning drop stations and facilities registered with the Texas Commission on Environmental Quality.

**IHW**  
Industrial and Hazardous Waste Sites  
VERSION DATE: 05/02/19

Owner and facility information is included in this database of permitted and non-permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations. The IHW database is maintained by the Texas Commission on Environmental Quality.

**PIHW**  
Permitted Industrial Hazardous Waste Sites  
VERSION DATE: 05/02/19

Owner and facility information is included in this database of all permitted industrial and hazardous waste sites. Industrial waste is waste that results from or is incidental to operations of industry, manufacturing, mining, or agriculture. Hazardous waste is defined as any solid waste listed as hazardous or possesses one or more hazardous characteristics as defined in federal waste regulations. Permitted IHW facilities are regulated under 30 Texas Administrative Code Chapter 335 in addition to federal regulations. The IHW database is maintained by the Texas Commission on Environmental Quality.

**PST**  
Petroleum Storage Tanks  
VERSION DATE: 10/01/19

The Petroleum Storage Tank database is administered by the Texas Commission on Environmental Quality (TCEQ). Both Underground storage tanks (USTs) and Aboveground storage tanks (ASTs) are included in this report. Petroleum Storage Tank registration has been a requirement with the TCEQ since 1986.

**APAR**  
Affected Property Assessment Reports  
VERSION DATE: 04/05/19

As regulated by the Texas Commission on Environmental Quality, an Affected Property Assessment Report is required when a person is addressing a release of chemical of concern (COC) under 30 TAC Chapter 350, the Texas Risk Reduction Program (TRRP). The purpose of the APAR is to document all relevant affected property information to identify all release sources and COCs, determine the extent of all COCs, identify all transport/exposure pathways, and to determine if any response actions are necessary. The Texas Administrative Code Title 30 §350.4(a)(1) defines affected property as the entire area (i.e. on-site and off-site; including all environmental media) which contains releases of chemicals of concern at concentrations equal to or greater than the assessment level applicable for residential land use and groundwater classification.

### BSA
The Brownfields Site Assessments database is maintained by the Texas Commission on Environmental Quality (TCEQ). The TCEQ, in close partnership with the U.S. Environmental Protection Agency (EPA) and other federal, state, and local redevelopment agencies, and stakeholders, is facilitating cleanup, transferability, and revitalization of brownfields through the development of regulatory, tax, and technical assistance tools.

### CALF
The Texas Commission on Environmental Quality, under a contract with Texas State University, and in cooperation with the 24 regional Council of Governments (COGs) in the State, has located over 4,000 closed and abandoned municipal solid waste landfills throughout Texas. This listing contains "unauthorized sites". Unauthorized sites have no permit and are considered abandoned. The information available for each site varies in detail and this historical information is not updated. Please refer to the specific regional COG for the most current information.

### DCRPS
This list of DCRP sites is provided by the Texas Commission on Environmental Quality (TCEQ). According to the TCEQ, the Dry Cleaner Remediation Program (DCRP) establishes a prioritization list of dry cleaner sites and administers the Dry Cleaning Remediation fund to assist with remediation of contamination caused by dry cleaning solvents.

### IOP
Texas Innocent Owner / Operator (IOP), created by House Bill 2776 of the 75th Legislature, provides a certificate to an innocent owner or operator if their property is contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination. The IOP database is maintained by the Texas Commission on Environmental Quality.

### LPST
The Leaking Petroleum Storage Tank listing is derived from the Petroleum Storage Tank (PST) database and is maintained by the Texas Commission on Environmental Quality. This listing includes aboveground and underground storage tank facilities with reported leaks.

The Texas Voluntary Cleanup Program (VCP) provides administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas. Since all non-responsible parties, including future lenders and landowners, receive protection from liability to the state of Texas for cleanup of sites under the VCP, most of the constraints for completing real estate transactions at those sites are eliminated. As a result, many unused or underused properties may be restored to economically productive or community beneficial uses. The VCP database is maintained by the Texas Commission on Environmental Quality.

Since recyclers post their own information, a facility or company appearing on the list does not imply that it is in compliance with TCEQ.
regulations or other applicable laws. This database is no longer maintained and includes the last compilation of the program participants before the Recycle Texas Online program was closed.

**IHWCA**

**Industrial and Hazardous Waste Corrective Action Sites**

**VERSION DATE: 07/09/19**

This database is provided by the Texas Commission on Environmental Quality (TCEQ). According to the TCEQ, the mission of the industrial and hazardous waste corrective action program is to oversee the cleanup of sites contaminated from industrial and municipal hazardous and industrial nonhazardous wastes. The goals of this program are to: Ensure that sites are assessed and remediated to levels that protect human health and the environment; Verify that waste management units or facilities are taken out of service and closed properly; and to Facilitate revitalization of contaminated properties.

**SF**

**State Superfund Sites**

**VERSION DATE: 01/16/19**

The state Superfund program mission is to remediate abandoned or inactive sites within the state that pose an unacceptable risk to public health and safety or the environment, but which do not qualify for action under the federal Superfund program (NPL - National Priority Listing). As required by the Texas Solid Waste Disposal Act, Texas Health and Safety Code, Chapter 361, the Texas Commission on Environmental Quality identifies and evaluates these facilities for inclusion on the state Superfund registry. This listing includes any recent developments and the anticipated action for these sites as documented in the annual state Superfund registry publication of the Texas Register as well as the Superfund Webpage on the TCEQ website.
### USTR06  Underground Storage Tanks On Tribal Lands

VERSION DATE: 10/01/19

This database, provided by the United States Environmental Protection Agency (EPA), contains underground storage tanks on Tribal lands located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

### LUSTR06  Leaking Underground Storage Tanks On Tribal Lands

VERSION DATE: 10/01/19

This database, provided by the United States Environmental Protection Agency (EPA), contains leaking underground storage tanks on Tribal lands located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

### ODINDIAN  Open Dump Inventory on Tribal Lands

VERSION DATE: 11/08/06

This Indian Health Service database contains information about facilities and sites on tribal lands where solid waste is disposed of, which are not sanitary landfills or hazardous waste disposal facilities, and which meet the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944).

### INDIANRES  Indian Reservations

VERSION DATE: 01/01/00

The Department of Interior and Bureau of Indian Affairs maintains this database that includes American Indian Reservations, off-reservation trust lands, public domain allotments, Alaska Native Regional Corporations and Recognized State Reservations.

The soil surveys that comprise your AOI were mapped at 1:20,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL: [Web Soil Survey](https://soils.usda.gov/)
Coordinate System: Web Mercator (EPSG:3857)
Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Harris County, Texas
Survey Area Data: Version 21, Jan 8, 2020

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jan 26, 2015—Feb 9, 2015

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Ms. Vanessa Rodriguez
Open Records Coordinator
PSQA-Environmental Hazards Group Manager
Texas Department of State Health Services
P.O. Box 149347
Austin, Texas 78714-9347

Subject: Open Records Request
1.23-Acre Undeveloped Property
Northeast of Center Street and Moy Street
Houston, Harris County, Texas

Dear Ms. Rodriguez:

We are currently performing an environmental assessment for a two-acre property located near the intersection of Center Street and Moy Street in San Houston, Texas. As part of the assessment process, we are requesting information about any known releases of hazardous materials or other environmental health concerns in the area of the subject property. The subject property is undeveloped land bound on the south side by Center Street and on the west side by Moy Street, as shown on the attached maps. This corresponds to a latitude-longitude of approximately 29.77.14° and 95.4141°.

Please provide any information for the immediate area of the subject property, such as the presence of USTs, asbestos, PCB's, urea formaldehyde insulation, petroleum products, drums, material spills, stressed vegetation, present or past dumping or fill, discolored or disturbed soil, unusual or noxious odors, monitoring wells, toxic substances, hazardous substances, radon, or other materials that pose a hazard to health or safety at the subject property or surrounding properties.

Thank you for your assistance in this request.

Sincerely,

ASPEN ENVIRONMENTAL, INC.

Mitchell T. Young, P.E.
Senior Engineer
