Expanding supply of affordable units [24 CFR 982.503]
The Department will implement payment standards between 90% and 110%, with higher percentages in areas where market rents were high and there is high demand for rental units it can be challenging for a voucher holder to find a unit. Sufficient payment standards will aid in areas where voucher holders have had difficulty in finding acceptable units or affording units in more desirable areas. Higher FMRs provide additional choices and opportunities to tenants in highly competitive rental markets. In areas where market rents are higher, poverty levels are lower, schools are better and there are more opportunities for employment. Ensuring that a household’s voucher provides enough assistance to house them and the vouchers is not over-subsidized. HUD changed the effective date of the Payment Standard to be effective January 1st of every year, or within three months of the FMR effective date, whichever is earlier. The effective date is applicable both to HUD-required revisions and to discretionary revisions.

Improve Performance and Processes
The Department will strive to obtain high performance status on the 2019 SEMAP and increase points in scoring area where the agency failed to meet the standard. In order to improve the performance rating, the Department will track the progress of the SEMAP indicators on a monthly basis improving voucher management and the PIC SEMAP reports. The Department is currently a standard performer under HUD’s SEMAP assessment system which consists of 14 evaluation criteria. Under the latest assessment for FY 2018, the Department lost points for improperly tracking passing unit inspections that had comments which should have resulted in a re-inspection of the unit prior to occupancy. Staff recently received module training pertaining to HQS, and best practices on how to generate re-inspections and pull PIC reports for the possible corrections. By updating standard operating procedures, and monthly reviews, these points are will be captured in the 2019 SEMAP. In addition, the Department will continue to monitor HAP payments monthly expenses to ensure that at least 98% of the Annual Contributions Contract is utilized or that 98% of total unit months are leased each year. For the calendar year 2019 the Department utilized 101% of regular HCV vouchers, 84% of NED vouchers, 100% of PB-VASH vouchers, 30% of Main Stream, and is working within the budget to increase lease up for TB-VASH so the funds are fully utilized.

Improve the quality of assisted housing
The department will improve the quality of the housing assessment by continuing the applicability of EIV’s Income Information and Verification Reports (i.e. Multiple Subsidy Report, Identity Verification Report, Immigration Report, and Income Validation Tool Report). These reports will be monitored and reviewed monthly. If needed corrections are needed, staff will be required to correct and resubmit for another review.

Increase assisted housing choices
The Department will be providing mobility counseling at briefings to inform families and property owners of our expanded housing choices. With the use of technology and our system software, it has allowed staff to streamline and improve the inspection process and better educate families and
property owners. In additions, maps are provided to our families educating them on specific census data tailored for the program.
Housing Needs.

Based on information provided by the applicable Consolidated Plan, information provided by HUD, and other generally available data, make a reasonable effort to identify the housing needs of the low-income, very low-income, and extremely low-income families who reside in the jurisdiction served by the PHA, including elderly families, families with disabilities, and households of various races and ethnic groups, and other families who are on the public housing and Section 8 tenant-based assistance waiting lists. The identification of housing needs must address issues of affordability, supply, quality, accessibility, size of units, and location.

Housing Need Analysis - Section 8

June 2019

When analyzing local housing markets and developing strategies for meeting housing challenges, HUD suggests the consideration of several factors. These factors include how much a household spends on housing costs, the physical condition of housing and whether or not the household is overcrowded.

An excess cost burden is identified when a household pays more than 30 percent of its gross income for housing costs. When so much is spent on housing, other basic household needs may suffer.

The measure of physical inadequacy is the number of units lacking complete kitchen and/or plumbing facilities. While this is not a complete measures of physical inadequacy, the lack of plumbing and/or kitchen facilities can serve as a strong indication of one type of housing inadequacy.

Overcrowded housing conditions may occur when a residence accommodates more than one person per each room in the dwelling. Overcrowding may indicate a general lack of affordable housing in a community where households have been forced to share space, either because other housing units are not available or because the units are too expensive.

The following table estimates the number of low-income households with housing needs for the 34 TDHCA Section 8 service areas. The figures are adjusted to 2017 levels based on population growth estimates.
